

Introducing... **wundatherm**[®]

OVERFLOOR HEATING BOARDS

...the best overfloor heating solution on the market!

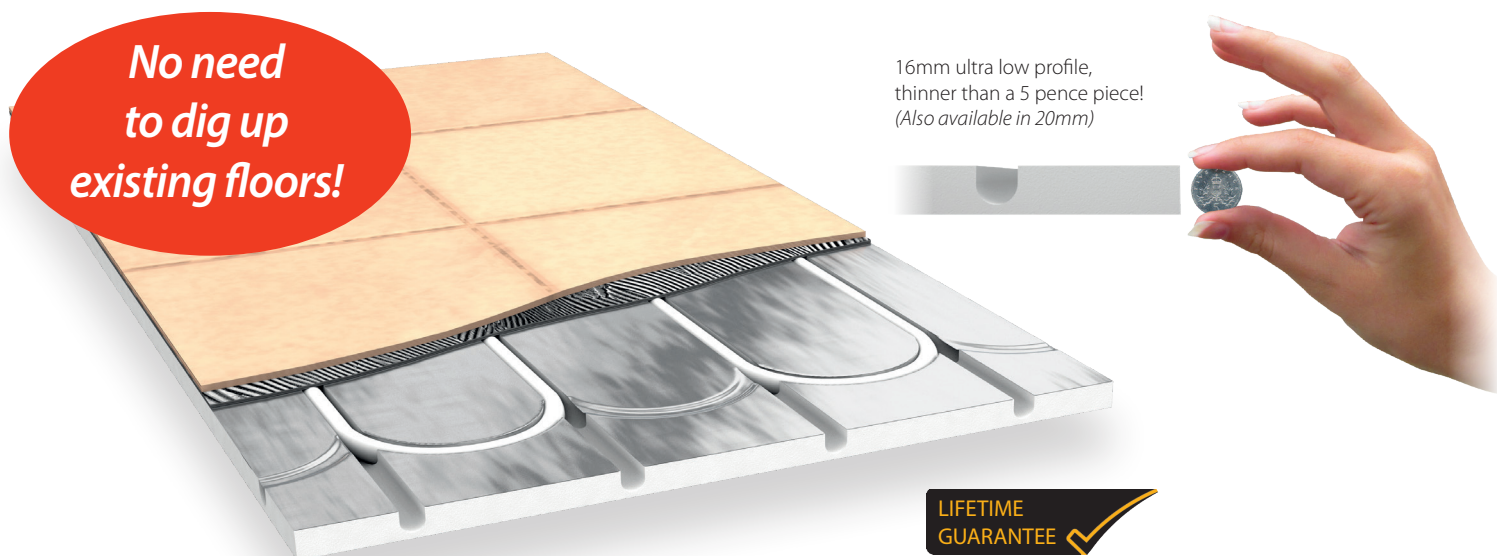

wundatherm is the new name for our existing EPS 400kPa, 200Kpa, and Acoustic overfloor range. But existing customers needn't worry, it's the same great quality product at the same great price!

SO WHY THE CHANGE?

We found there are many competing products on the market which are vastly **inferior** to our range of overfloor boards, using softer EPS and thinner Aluminium foil, but the problem is - **THEY LOOK THE SAME AS OURS!**

To avoid the confusion we created the *wundatherm* brand to help separate our products from the rest.

So, if you want great quality at a great price, look for *wundatherm* by name
...it's your guarantee of quality!

Lightweight, easy to install, suits all new build & renovation projects.

- Once installed, the system is ready to use immediately - there's no waiting
- It's the perfect partner for any type of boiler and low temperature Heat Pumps
- We've sold thousands of systems - check out our 5 star reviews
